

# Alistair Bailey

I currently work as a learning technologist supporting Librarians at the University of Southampton.<sup>1</sup>

An engineer by training, I have since worked primarily as an informatician and research scientist investigating antigen processing and presentation by major histocompatibility molecules.

My most recent project was CRUK Accelerator: Improving immunotherapy treatment for cancer patients.<sup>2</sup> Other projects I have worked on include research into influenza, COVID19, skin sensitization to chemical allergens, asthma and contagious cancer in the Tasmanian Devil. I am also a Data and Software Carpentry<sup>3</sup> instructor.

### RESEARCH FELLOW

Centre for Proteomic Research/Cancer Sciences, University of Southampton

📍 Southampton, UK

- Cancer Research UK Accelerator: this project aims to identify potential treatment targets for hard to treat cancers such as lung cancer using peptidomics methods.

In my role, I process, analyse and manage data from various Omics technologies, primarily whole exome sequencing, RNAseq and proteomics. Proteomics data I receive as Thermo raw data and process with Peaks Studio<sup>5</sup>, and post-process in R and RStudio. Whole exome and transcriptomics data I receive as fastq files and I use a mixture of command line tools using bash scripts and R and RStudio. I tend to follow the Broad Institute Best Practices for genomic data analysis<sup>6</sup> and Cornell Bioinformatics Core<sup>7</sup> for transcriptomic data processing. Scripts and processed data are managed using git version control. Raw data is backed up remotely and deposited along with processed outputs public repositories such as EBI PRIDE<sup>8</sup> and the European Phenome-Genome Archive<sup>9</sup> following FAIR protocols<sup>10</sup>. My primary computer is a Linux Ubuntu machine, but I also use Windows.

- We have also developed our method to identify treatment targets for infectious diseases such as influenza.
- In 2020 I also worked to develop a COVID19 test using proteomics methods.

### INTERNSHIP

Microsoft Research

📍 Cambridge, UK

- Helped develop computational model of MHC I peptide selection.

I have worked in a variety of roles ranging from engineering to research scientist. I like collaborative environments where I can learn from my peers.

1995
- FILM AND TELEVISION POST-PRODUCTION ENGINEER**  
Telecine 📍 London, UK
- I trained as an engineer to operate various TV & film post-production equipment.

## TEACHING EXPERIENCE

- 2018
- SOFTWARE CARPENTRY**  
Umeå University 📍 Umeå, Sweden
- Taught R for Reproducible Research and assisted in Command Line Basics.
- 2017
- DATA CARPENTRY**  
University of Southampton 📍 Southampton, UK
- Taught R for Reproducible Research and assisted in Command Line Basics and git.
- 2017
- DATA CARPENTRY**  
University of Southampton 📍 Southampton, UK
- Taught R for Reproducible Research and assisted in introduction to SQL.
- 2017
- SOFTWARE CARPENTRY**  
University of Southampton 📍 Southampton, UK
- Assisted with python and git for reproducible research.
- 2018
- BRITISH SOCIETY FOR PROTEOMICS 2018 DATA SCIENCE WORKSHOP<sup>11</sup>**  
University of Bradford 📍 Bradford, UK
- I created and taught a proteomics data science workshop including introduction to R, Volcano plots, heatmaps and peptide logos.
- 2020  
|  
2019
- CODING TOGETHER<sup>12</sup>**  
University of Southampton 📍 Southampton, UK
- I created and taught an eight week series of collaborative workshops to teach foundational R coding and data science skills based on Carpentries materials.

I am enjoy teaching foundational coding and data science skills to researchers and developing evidence-based best practices. I am especially interested in helping novices and making coding more accessible to all.
